

Title: **Scia Engineer 14.0.115 (0-patch) has been released**

Available from: Scia Engineer 14

Category: Scia Engineer

Date: 06/06/2014

Content:

- Setup from version 14.0.115 is available for download.

Data version number: 168.

Data stored in this version can be opened in version 14.0.101 (External Release 14.0) and higher.

Solved issues:

- A bug fix for [Brazil Concrete 2D](#). There was an option missing in the property window of the 2D concrete options which made it impossible for the user to choose a value.
- Problem with [Try-Out version](#): The "select all licenses" in the protection setup for a try-out license did not find the version license (_esa.1400). This is now solved.
- [Copying of settings](#) from version 13.1 in Setup: During the installation of this version or higher, the setup will be able to copy the user settings from lower versions.
